DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bretzlaff et al. (Bretzlaff)(US 2325222). Bretzlaff teaches a heat dissipating fan assembly having a motor 57 in a casing with a single shaft 59 having first and second shaft sections supporting first and second propellers 37 surrounded by shrouds 39, where the first and second propellers rotate simultaneously to produce air currents at two opposite sides of the fan assembly. Bretzlaff teaches the motor casing includes an flange (see figure 3 at 55) outer wall with the partition plate 53 between the propellers. Bretzlaff teaches the partition is a vertical support connected to the motor through the motor casing.

5. Claims 1, 2, 5, and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hardin (US 2190118). Hardin teaches a heat dissipating fan assembly having a motor 36 in a casing 35' with a single shaft having first and second shaft sections supporting first and second propellers surrounded by shrouds (see figure 9), where the first and second propellers rotate simultaneously to produce air currents at two opposite sides of the fan assembly. Hardin teaches a vertical support 34 connected to the motor 36.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 - 2036.
